

第128回 OPERA研究交流セミナー

第120回 ISIT有機光エレクトロニクス研究特別室セミナー

第187回 未来化学創造センターセミナー

日時: 2015年7月10日(金) 15:00-

場所:九州大学 共進化社会システムイノベーション施設 2F大会議室

Water: The Oil of 21st Century

Taro Mieno

Luc Hoffmann Postdoctoral Fellow,
Institute on the Environment, University of Minnesota

Water is a vital good that is the basis of our lives. Some parts of the world have already been facing severe water scarcity, such as California. More and more regions are considered to be water-scarce in the near future, which is expected to have enormous negative impacts on our livelihood. In this seminar, I first highlights some key facts about the current state of water use pattern and availability. I then talk about the causes of the problems. Finally, I will talk briefly about some of my previous work that try to address the issues raised within the presentation.

**主催:九州大学 最先端有機光エレクトロニクス研究センター
